MONTHLY MEETING

Saturday September 8th, 2001
noon - 2pm
EECSci 3-180

This month's topic:

Kylix Demo by Logicworks Inc.

Borland Kylix, the first native-code rapid application development (RAD) environment for the Linux platform, is a component-based development environment for two-way visual development of graphical user interface (GUI), Internet, database and web server applications. Kylix integrates a leading edge development environment, interactive debugger, intuitive visual designer and a comprehensive component palette to give developers the tools they need to deliver Linux applications fast. Kylix's state of the art optimizing compiler is seamlessly integrated to produce high-performance applications at high-speed. For more information about Kylix, visit http://www.borland.com/kylix/

For more information on Logicworks, go here: http://www.logicworksinc.com/

The Twin Cities Linux Users Group is a group of Linux users in the Minneapolis, MN area. If you are curious about Linux, or looking for technical answers, we encourage you to join us. The TCLUG holds monthly meetings in which we discuss various topics related to Linux. This gives our members a chance to interact with one another while learning about Linux. About every 4-5 months we have an installfest, which allows new users to get "a helping hand" while installing Linux. Our mailing list is full of discussions about Linux, hardware, software, and everything in between, and is open to the public. There is no fee to join the group, and meetings are open to everyone. If you have any questions about our group, please e-mail info@mn-linux.org. Access to the mailing list and more information can be found at http://www.mn-linux.org/

Thanks for sponsoring this event on the UMN campus goes to:
